**DEPARTMENT OF PSYCHOLOGY**

# MAGNA EGET EST LOREM IPSUM DOLOR SIT AMET.

**Gain insight**

The Assumption psychology program gives you the opportunity to explore these questions and more.

In the classroom and the research laboratory, you are introduced to the broad spectrum of psychology and its practical applications. In addition, Assumption provides you with a strong liberal arts foundation that allows you to apply your psychology degree to a range of rewarding careers or move on to graduate school.

**Mindful exploration**

Studying psychology at Assumption prepares you for a wide variety of career paths - from foundation courses that address general concepts and theoretical perspectives to electives that allow you to

personalize your education and delve more deeply into specific areas of interest. The psychology program teaches students to become better analysts, communicators, and problem solvers in order to develop skills that are necessary in the work force and in life.

Here, you have the opportunity to perform cutting-edge research alongside professors in our state-of-the-art facilities for mental health, developmental, learning and memory, and neuroscience research. They specialize in a variety of areas, providing students with an array of study options. Avid educators and mentors, our faculty members foster a culture of collaboration among fellow professors and students alike.

**#AUachievers**

*"I credit the success I had at my internship to Assumption. Not only are the professors extraordinary, but the knowledge I gained surpassed my expectations."*

*Because of the small classroom setting and faculty-to-student ratio, students truly get to know their professors and develop relationships that lead to opportunities for mentorship, research, collaboration, and experiences that aren't possible at other schools. Assumption has thoroughly prepared me for my graduate work."*

**Lindsay Gomes '18**

Psychology, Research Assistant in the Psychology Department at Assumption College, Post-Grad Plans: Pursuing a Ph.D. in Developmental Psychology at the University of North Carolina at Chapel Hill

**DID YOU  
KNOW?**

**Assumption and the University of Massachusetts Medical School, located only four miles from the College, have formed a research partnership through which Assumption psychology students have the opportunity to work alongside top researchers on cutting-edge projects, in both paid and unpaid internships.**

## Course of study

### PSYCHOLOGY

**Major or Minor.** Assumption psychology majors are known for their strong communication skills, understanding of human behavior, problem-solving skills, and ability to collect, organize, analyze, and interpret data and information. You will take foundation courses that address general concepts and theoretical perspectives and electives that allow you to delve more deeply into a specific area of interest: child development, social psychology, abnormal psychology, interpersonal communication, motivation and emotion, and cognitive and brain science.

### Major in Psychology with Concentration in the Neuroscience of Human Behavior.

This major is ideal for students who wish to focus on the psychological aspects of brain function. Students in this concentration are grounded in some foundations of biological and psychological science and then apply these tools to the specialized study of social, cognitive, and affective neuroscience. Students in this concentration will be prepared to work in research laboratories and to explore career avenues in applied neuroscience.

**Minor in Applied Behavior Analysis.** The minor in ABA is an interdisciplinary program that prepares students to work in a variety of settings, especially agencies that serve children and adults with autism and developmental disabilities. Students learn evidence-based procedures for teaching communication, social, vocational, and pre-academic skills to clients and have the option of completing an ABA-based internship.

## DID YOU KNOW?

**Assumption undergraduates perform research projects with faculty in advanced psychology laboratory facilities. The scope of these projects differ according to academic interest, such as emotional reactivity, autism, or co-parenting. Students have published some of these projects in academic journals and/or presented at academic conferences.**

## Learn by doing

In order to gain valuable career experience and increase the competitiveness of your applications to graduate programs, psychology majors are strongly encouraged to participate in an internship.

As part of your internship, you also complete a reflective journal, readings in the field, and a comprehensive research paper. Your Assumption professors will serve as both sponsors and mentors during the entire experience. Through your internship, not only will you acquire the knowledge, confidence, and professionalism that will give you a leg up in today's competitive job market, but you'll also make important contacts that may lead to employment.

### SAMPLE INTERNSHIP SITES

Behavioral Concepts, Inc.  
 Central Massachusetts Collaborative  
 Eisenberg Assisted Living Residency  
 Elder Services of Worcester  
 Massachusetts Department of Social Services  
 University of Massachusetts Medical School  
 Worcester Juvenile Court  
 Worcester Public Schools

## WHAT'S NEXT?

Many of our graduates go on to complete their master's degree or doctorate in psychology, sociology, rehabilitative services, and law at leading institutions.

Psychology majors enter directly into careers in such fields as education, human resources, marketing, communications, and counseling.
